Operational Security Considerations for IPv6 Networks

Abstract

Knowledge and experience on how to operate IPv4 networks securely is available, whether the operator is an Internet Service Provider (ISP) or an enterprise internal network. However, IPv6 presents some new security challenges. RFC 4942 describes security issues in the protocol, but network managers also need a more practical, operations-minded document to enumerate advantages and/or disadvantages of certain choices.

This document analyzes the operational security issues associated with several types of networks and proposes technical and procedural mitigation techniques. This document is only applicable to managed networks, such as enterprise networks, service provider networks, or managed residential networks.

Goethe
S a u s t

Der Tragödie
erster Teil

Dies Buch ist auch gebunden käuflich!

Daß ich erkenne, was die Welt
Im Innersten zusammenhält

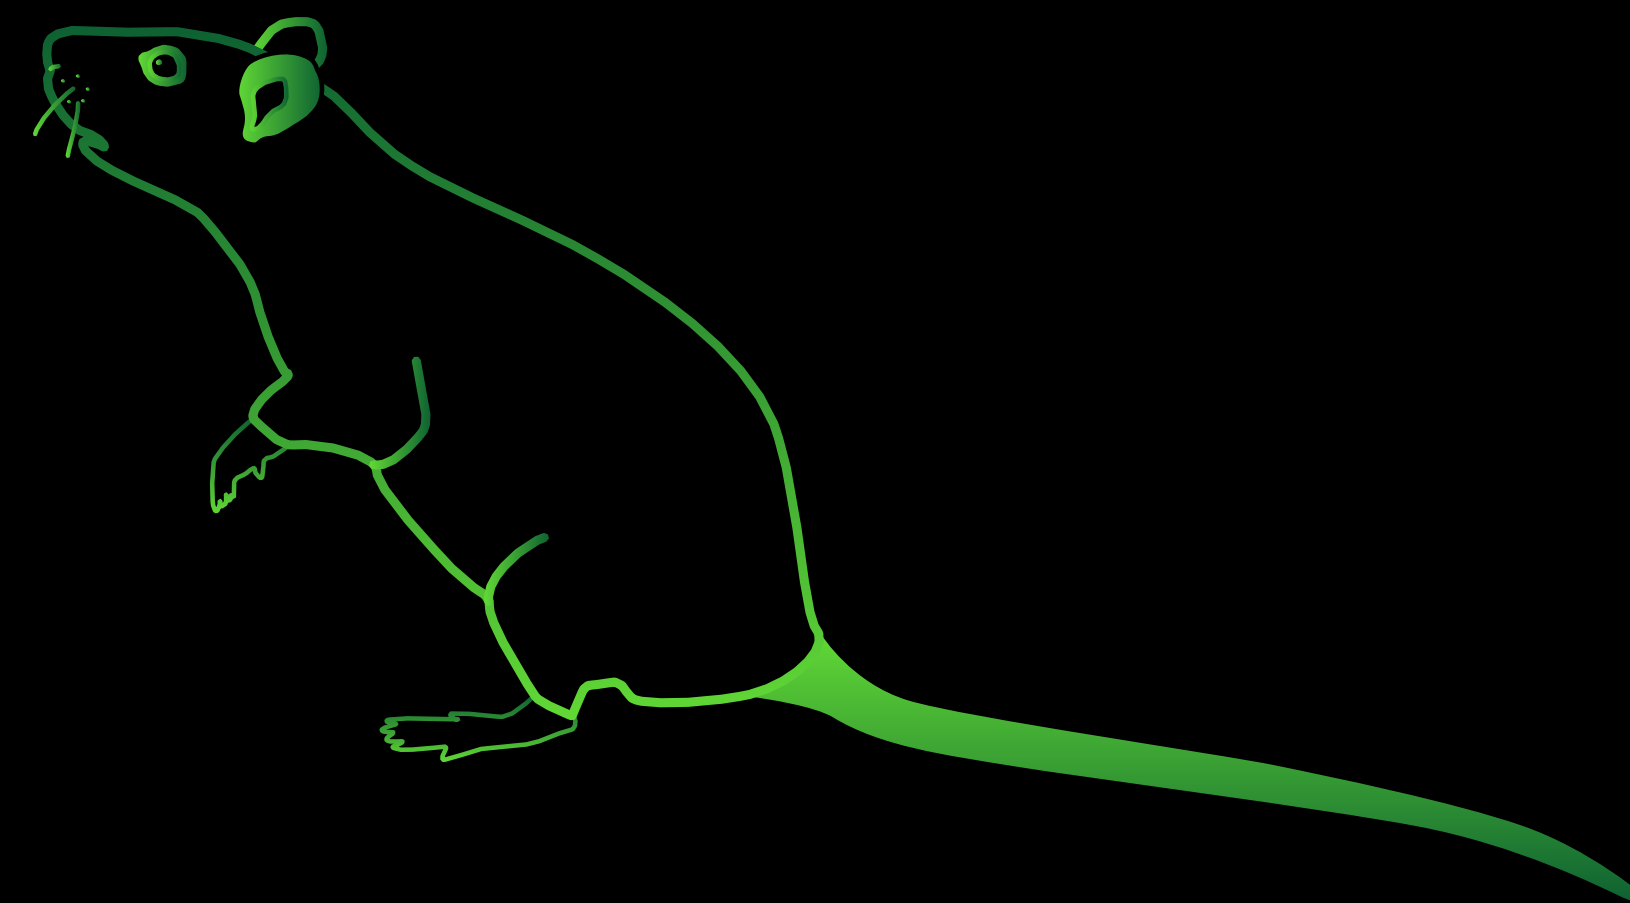

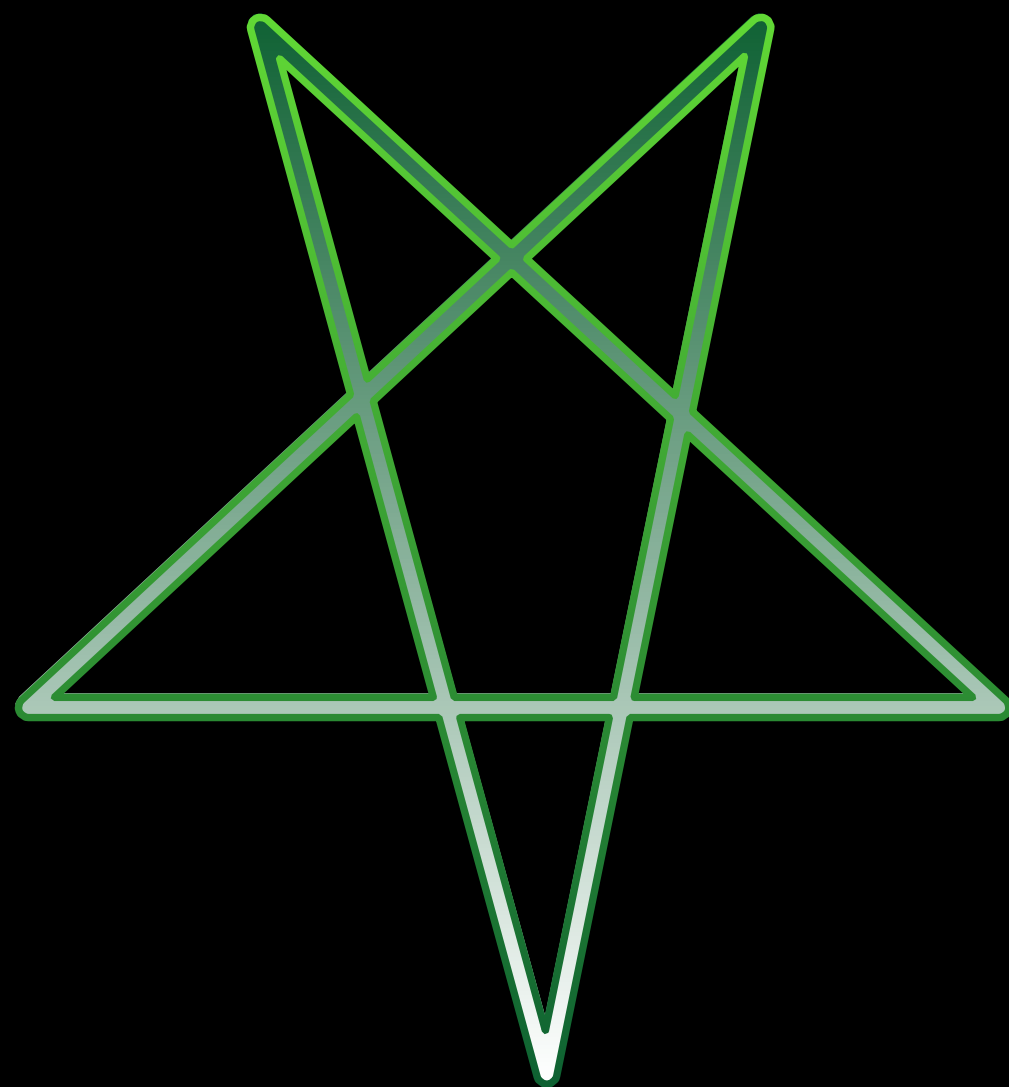

That I may detect the inmost force
Which binds the world, and guides its course

Ein Teil von jener Kraft,
Die stets das Böse will und stets das Gute schafft

Part of that Power, not understood,
Which always wills the Bad, and always works the Good

Nun sag, wie hast du's mit der Religion?

How is't with thy religion, pray?

Des Menschen Tätigkeit kann allzu leicht erschlaffen,
er liebt sich bald die unbedingte Ruh;
Drum geb ich gern ihm den Gesellen zu,
Der reizt und wirkt und muß als Teufel schaffen.

Man's active nature, flagging, seeks too soon the level;
Unqualified repose he learns to crave;
Whence, willingly the comrade him I gave,
Who works, excites, and must create, as Devil.
